Accelerating business outcomes with insights you can act on

The power of CGI + NetApp + cloud

Whether you're developing in the cloud, moving to the cloud or creating cloud-like experiences on premises, your cloud journey is unique. You need to use the clouds you want, the way you want, to create efficiencies for bottom-line impact and power innovation for top-line growth. Yet, just 20% of the executives interviewed for the 2021 CGI Voice of Our Clients survey show they're achieving expected results from their investments in cloud-driven digital transformation.

To accelerate and future-proof your journey, you need a smart and proven approach that's based on real-world experience in overcoming challenges like inflexible cloud strategies and cloud lock-in, simplistic modernization plans or governance, security, management and operational models that just weren't designed for cloud. You need insights you can act on from partners you can trust to can co-create, deliver and manage innovative, cloud-composed, digital business solutions at pace and scale.

Powering action and business outcomes through insight

Bringing together industry-leading solutions and services, decades of experience, broad industry expertise and a deeply shared commitment to your success, CGI and NetApp empower you to unlock the full potential of cloud faster. From generating ideas and building strategies to managing agile at scale, CGI and NetApp collaborate closely with you at every step of your cloud journey.

We can help you:

- Build a hybrid multi-cloud strategy to establish best-fit platforms and deployment models.

- Accelerate the journey to cloud by combining our client proximity model with our first-hand experiences, skills and knowledge of what works—and what doesn't.

- Maximize the value of enterprise data by making it easy to manage, mobilize, analyze and access it, securely.

- Gain the flexibility of a consumption-based model to provision, monitor and move storage spend across the hybrid cloud environment.
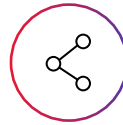

And it's all powered by industry-leading alliances with your choice of major cloud providers, including AWS, Microsoft Azure, Google Cloud Platform and IBM Cloud. Wherever you are on your journey to cloud, we're here to help you move forward faster.
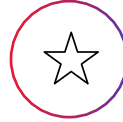

About CGI

Among the largest IT and business consulting services firms in the world, CGI provides end-to-end services and solutions, collaborating closely with you in a unique local relationship model that's complemented by a global delivery network. From generating ideas and building strategies to managing agile at scale, CGI helps you rethink how business gets done, so you can optimize your digital value chain and accelerate business outcomes.
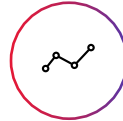

Why CGI?

Unique client proximity model combined with global delivery network serving global clients in every industry

One of the industry's highest client satisfaction ratings at 9.3 out of 10

More than four decades of sustained growth and financial stability

Over 200 intellectual-property-based industry solutions to deliver market-leading outcomes with agility and speed.

Global portfolio of secure and flexible end-to-end services aligned to industry priorities, including strategic IT and business consulting, systems integration, IT managed services and intellectual property solutions.
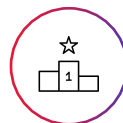

About NetApp

As a global, cloud-led, data-centric software company, NetApp helps you lead with data, providing systems, software and cloud services to run your applications optimally from data center to cloud. With 30 years of experience and solutions that perform across diverse environments, NetApp helps you build your own data fabric and securely deliver the right data, services and applications to the right people—anytime, anywhere. NetApp delivers higher quality projects faster and with less risk for our partners and clients.

Why NetApp?

#1 shared storage platform across cloud, data services, storage systems and software (IDC)

Leader in Primary Storage Magic Quadrant–four years in a row (Gartner)

All the biggest cloud providers choose and use NetApp technology

Partner of the Year: AWS ISV, Google Cloud, Microsoft US for SAP on Azure

Cloud Factory from CGI and NetApp

Accelerating cloud adoption with a smart, agile and scalable methodology to evolve from plan to transform to manage, leveraging NetApp's own cloud journey experience (NetApp on NetApp):

• Future-proof your technology and cloud strategy, architecture and roadmaps

• Accelerate the modernization of application and data environments, as well as critical IT foundations, such as API management, container orchestration and cloud security.

• Propel your product and service innovation with cloud-native development and DevSecOps factory

• Modernize complex legacy core systems with agile SaaS integration and configuration or an agile domain-driven rebuild, while ensuring your business continuity and minimal risk

• Govern, manage, run and optimize it all, securely and compliantly, using our full-stack site reliability engineering (SRE) and CloudOps / AIOps managed services for multi and hybrid cloud environments.

• Harness cloud to realize your sustainability goals.

Let's do this.

Contact your CGI representative today to learn more about how CGI and NetApp can help you unlock the full value of data in your accounts.
